

Is the end coming?

Written by Administrator

All review activities have been suspended until further notice. We are really tired of all the marketing and false reviews in the internet. We tried to be honest but this unfortunately is not enough to keep us moving. You can be sure that each and every one review hwreviewlabs is genuine and not sponsored by anyone. Hwreviewlabs is perhaps the only review site in the world that was purchasing the review material that companies were not willing to provide. Unfortunately there is not enough time and enthusiasm to continue, everything became a big marketing plan and we are not willing to participate anymore.
